
Display FARENHEIT!!!

Posted by li_gordon - 2008/01/28 17:44

I like the module and the component, the problem is that I am from the USA, and I need Farenheit displayed, not celcius.

On the Eweather component, wether I select Metric or English it still displays Celcius.

On the RafWeather Module, I can not find a place to change it to display in farneheit.

PLEASE HELP!!!!

thank you so much,
Laura

Hi!

If you change units, you have to wait about 30 mins (Cache time 1800) before the change takes place.

Best regards,
Skorp
