Hi,

I just installed the Cloud component and was putting words on the blacklist (I use the Sobi plugin) and suddenly I get the following error:

Parse error: syntax error, unexpected T\_STRING in  
/home/voor002/domains/paardensport.nu/public\_html/administrator/components/com\_rafcloud/settings.php on line 6

Any ideas?

Hi!

File "settings.php" is broken, restore this file from backup or from component package.  
This problem will be solved within the next few days.
