## Autopublish not working?

Posted by Kremzeek - 2008/07/24 18:25

---

Raf Cloud is able to find key works and meta tags without any problems but it won't autopublish them. I have this option checked in the configuration and the only way they'll show up is if I go in and manually publish them. I'm running Joomla 1.5.3 if that matters.

Hi!

Here is a patch for this problem:  
Download

Best regards  
Skorp

I'm using it from few seconds, but by default raf clouds take meta tags and generate a cloud of tags? because I see it without keywords in <http://www.horeca1.eu>
