Hi!

yes, I am not interested in the data, just the structure of the database.

here the structure.

if i want to show hotels names or cities.

the cities and hotel names are in jomres_properties

Hi!

I need the .sql file with structure of the database including tables with fields, field types etc. You can export your database using phpmyadmin or command-line mysqldump.

Hi!

Thank you for sending the SQL dump.

You can find the alpha version here: [Download](#)

Please let me know of any bugs.
