Thank you.
I've installed the patch,
but it doesn't work :(

I have:

Configuration -> Words -> Whitelist:

Whitelist:: whitelist, blacklist Allowed words separated by a comma. Published by default.

Tab "Manage tags" ordered by "Published?":

Tags	Lenght	Published?	Type	Counter	Font size (%)	Added	New
0	Published	Word(Whitelist)	3	70	2008-11-20 12:13:38		
artikel	7	Published	Word	30	129	2008-11-20 11:51:44	
bild	4	Published	Word	35	140	2008-11-20 11:51:44	
knopf	5	Published	Word	12	89	2008-11-20 11:51:44	
seite	5	Published	Word	13	91	2008-11-20 11:51:44	
/pub	4	Add to blacklist	Unpublished	Word	4	0	2008-11-20 11:51:23

The result is attached.

What is wrong by me?
