
... exclude a category or section of articles

Posted by bloggita - 2009/07/30 00:20

Hello,

First I want to thank all developers of this fantastic component! Great work! B)

I have a little problem...

is possible to exclude a category or section of articles from the component?

Many thanks and regards. :)

Hi!

yes it is possible, but only with some additional code.

open the file rc_joomla_content_plugin.php (administrator/components/com_rafcloud/plugins)

```
$database->setQuery("SELECT * FROM #__content WHERE state=1");
```

replace with:

```
$database->setQuery("SELECT * FROM #__content WHERE state=1  
AND sectionid NOT IN (0,7,11,44) AND catid NOT IN (0,4,6)");  
// excluded sections 7,11,44 and categories 4,6
```

rc_joomla_keywords_plugin.php

```
$database->setQuery("SELECT metakey FROM #__content WHERE state=1");
```

replace with

```
$database->setQuery("SELECT metakey FROM #__content WHERE state=1  
AND sectionid NOT IN (0,7,11,44) AND catid NOT IN (0,4,6)");
```

Hi!

Great!! Thanks skorp! :woohoo:

Perfect, I add the code. ^_^

Hi,

I changed the code but still cannot find where to exclude certain categories.
was looking in the component and in the module but cant find it :(

would be gratefull for a quick solution

cheers

michse
