
RAF module not displaying sobi2 meta tags

Posted by jon73 - 2010/02/17 16:36

Hi

I have set up sobi2 all the entries have descriptions and keywords and everything was working fine. However I recently updated both sobi and RAF, rebuilt lists, cleared cache, recounted entries...the works.

The entries are in tact with their meta tags still there, the RAF component administration is showing those meta tags as listed and published...but...the module is blank.

www.mycitylink.co.uk/businesses

some help please

=====

Still an issue? Assuming you are using Joomla 1.5, right?

I have running sobi2 metatags generated by raf_cloud fine.

How does your modules options in backend looks like? Is Sobi2 output enabled?
