
Empty Tag list

Posted by chemopetrol - 2010/03/05 14:43

Hi,

I succesfully installed component, mambot and module for RAF Cloud. I added key words in Component -> Configuration, but my TAG list is still empty. I tried Rebuild list of course. I'm using Joomla 1.0.15 and RAF Cloud 2.0.2

Thank you for your tips

Ben

Sorry can't help you with this specific issue as I only use j1.5.

But if you only use static keywords like you describe then rafclouds is not what you want. You can instead use a custom module and place it at buttom and define keywords within.

Hope that helps,
Gunnar
