
bug raf cloud component

Posted by caravaggio - 2007/12/10 19:56

i'm getting this error on the "manage words" page. the cloud module is not getting populated.

Notice: Trying to get property of non-object in

/var/www/vhost/sierraeye.net/home/html/administrator/components/com_rafcloud/admin.rafcloud.html.php on line 61

i'm using Joomla 1.0.13

any clue about it?

Hi!

What language version?

Skorp

it should be english. I mean the joomla version i'm using is the official one in english and there's no other language installed. Phisically the site is hosted in Italy and my OS is in italian. But i dont think that what i'm saying makes any sense.

Hi!

Line 61:

```
$alt = $row->published ? $adminLanguage->A_COMP_PUBLISHED : $adminLanguage->A_COMP_UNPUBLISHED;
```

You may have to check your admin language file.

What about other components (banners,contacts,weblinks) ?

Skorp
